

# Solrif® in-roof photovoltaic system from Schweizer

Established for more than 20 years.

## Functional aesthetics, high solar yields, easy to mount

- Tried and tested in practice: Market leader in PV roof integration, approx. 800 MWp installed since 1999.
- Max. flexibility in terms of arrangement, shape, colour, dealing with obstacles, roof windows etc.
- Always at the cutting edge of technology (power, yield, colour etc.) through the use of standard commercial modules.
- Free lower edge of module guarantees a high yield: self-cleaning, snow slides off.
- Simple planning with Schweizer's PV tool, from static design by way of electrical planning to roof layout and item lists for comprehensive system documentation.
- Easy to lay: tile principle with storm clamps floating on laths.
